EXHIBITIONS

Lifel on an Island
The Story Tellers
Life on an island/sea is a rich source of stories, characters and motifs for artists. For those of us that have never been to an island, the stories paint a picture of an idyllic paradise, a place to visit and enjoy. This exhibition will present a collection of works on paper with miniature illustrations that explore the ideas of life on an island. Some have been inspired by literature,而 others are original stories.

Visualising the Future: Images and Stories by the Citizens of Clarence
Emerging from a project by Dr Chris Cook, this exhibition will combine photographs and interviews that have been gathered over the past 6 years. Visualising the Future is a project that is not just about the future, but also about the present. Clarence is in response to two questions: What do you love about the island of Clarence? What do you like and dislike about your age? The exhibition will explore the visual connections between generational groups, challenging the myths and stereotypes based on age.
